

The only versatile CCTV camera in the world to effectively protect any community or asset in any environment or application and that's not all, [read more](#)

- Multiple camera unit meeting any optical requirements by using any specified major brand high performance PTZ with any specified fixed contextual view camera.
- An ultimately versatile plug-and-play modular configuration, simplifying permanent or temporary CCTV camera deployment options for populated open space, or non-populated multiple or single attack intruder environments. Protecting any area, from close proximity the size of a small garden, up to a large open space the size of 14 football pitches, in all directions simultaneously.
- Maximum flexibility to operate as an unmanned stand-alone camera with operator override for:
 - Manned central control rooms, or
 - Mobile observation posts

Technical Data

- Daylight monitoring range for situation awareness from 2m up to 200m.
- Recognition evidence from 2m up to 147m.
- Identification evidence from 2m up to 61m.
- Night monitoring IR range from 2m up to 100m, or 50m in any direction using Black IR.
- Up to 6 fixed high resolution cameras for up to 360 degrees coverage - detection and contextual view evidence
- 1 x high resolution Pan, Tilt and Zoom camera - close up evidence - Pelco Spectra, Pelco Esprit and Bosch MIC 1 Series

The only effective CCTV camera in the world to automatically protect everywhere it is instructed to at the same time and that's not all, [read more](#)

- Multitasking CCTV camera unit automatically scouting in all directions simultaneously.
- The world's leading per camera evidence capture statistics capturing at least 25 times more court quality evidence than any other manned, manned response or unmanned camera solution.
- The PTZ automatically following, zooming into and switching between events if they occur at the same time, but continuing to track all suspects' locations no matter if they speed up, slow down or change direction.
- Not only effectively dealing with multiple events in every direction at the same time but successfully foiling diversion tactics.
- Easily instructed with various priority surveillance levels, based upon particular activities and locations.

The only Preventative CCTV camera in the world with the only better deterrent being resident security staff constantly on alert and that's not all, [read more](#)

- The Viseum IMC performs as though it is constantly "manned" by operating completely automatically, with manual operator override, but with no manual operator fatigue.
- By being seen to be consistently active and constantly delivering results, this is proven to give communities reassurance of constant protection and a visible long term deterrent to would-be offenders.

The only multitasking CCTV camera in the world that stores evidence and produces it all automatically when needed and that's not all, [read more](#)

- Multiple view CCTV camera evidence of the same event
- Both wide contextual view and close-up evidence of any incident are recorded to built-in storage for primary or back-up use.
- Using Viseum-driven Videosweeper the Viseum Auto-intelligent DVR (AiDVR) is interrogated automatically to find evidence up to 5,000 times faster than the naked eye.

Viseum IMCs have been granted 20 years patent protection

Any non-Viseum branded IMC system is either noticeably inferior or an illegal copy and in breach of International Law

European Patent 1579399, International Patent Pending: PCT/GB 03/04691, PCT/GB2006/001414 Canadian Patent Pending CA2505340

■ CCTV Control Room Integrated

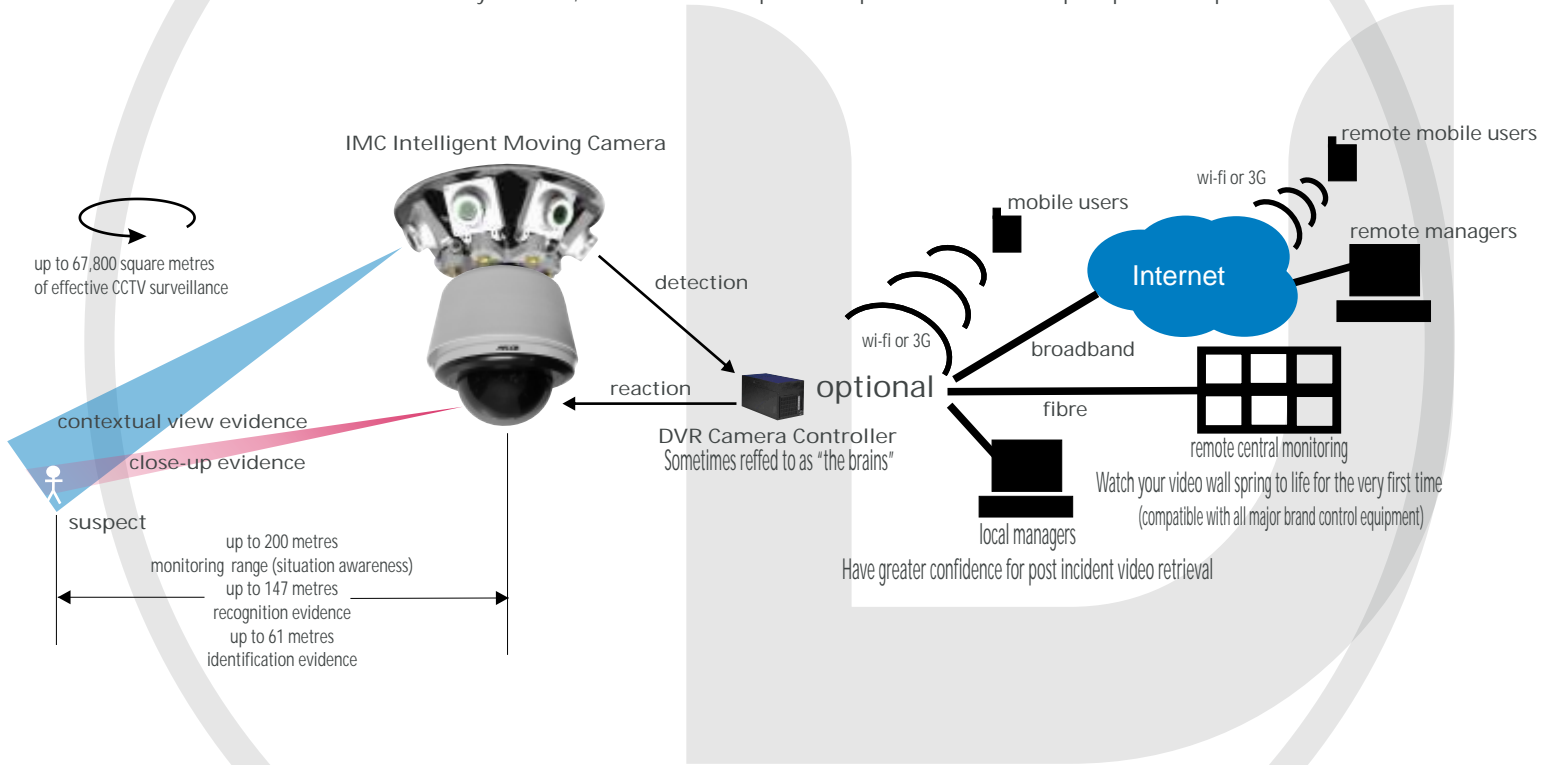

Providing the best of both worlds where Viseum's machine-to-machine intelligent automation interplays with human vigilance. Have your Viseum IMCs zoom into and follow activity of interest so that your operators can watch your video wall spring to life for the very first time. Your camera operators can always seamlessly override Viseum's automation, but when they are too busy or simply unavailable and crimes are committed, high quality close up evidence will still get captured and the long term deterrent will always be sustained.

■ Re-deployable or Re-locatable CCTV

Re-deployable moving cameras are becoming Viseum IMC enabled, because missed opportunities due to operator fatigue are reduced, and significant man hours are saved in re-deploying and adjusting camera positions.

■ Remote Standalone CCTV

If you want the best available CCTV for your business or residential communities, or if you are just looking for the most cost-effective solution to cover all your areas, Viseum IMCs are a powerful option for standalone open space CCTV protection.

Viseum IMC (Intelligent Moving Camera):

Up to 7 high resolution cameras in one unit - extended dual evidence of any incident:

- Up to 6 fixed high resolution cameras for up to 360 degrees coverage - detection and contextual view evidence
- 1 x high resolution Pan, Tilt and Zoom camera - close up evidence - Pelco Spectra, Esprit and Bosch MIC series

CCTV DVR Camera Controller:

A complete CCTV scheme from just one box:

- High Performance Dual Core Computer (various models to suit requirements)
- Virtual Operator Assistant (VOA) Software for intelligent automated detection and camera control
- Integrated Auto-intelligent Digital Video Recorder (AiDVR) Software with 30 days local storage (for primary use or backup)
- Alternatively all cables can be fed into any other storage solution and patched though to the AiSU
