Automated Person Profiling

- Viseum iVOS FaceRec captures an image from many sources – Direct (CCTV) Indirect (mobile phone, Facebook, camera...in fact anything that takes a picture!).
- Viseum iVOS FaceRec stores that face in a “suspect file” to be monitored by the system.
- Viseum iVOS FaceRec can then automatically create a full profile of the same person by detecting similar images stored on file.

Find By       

Identity Details	Associated Faces
FirstName <input type="text" value="Alex"/>	
MiddleName <input type="text"/>	
LastName <input type="text"/>	
Nationality <input type="text"/>	
Sex <input type="text" value="M"/>	
Date of Birth <input type="text" value="10/12/2012"/>	
Address <input type="text"/>	
Organization <input type="text"/>	
Threat Level <input type="text"/>	
Passport Number <input type="text"/>	
Date of Issue <input type="text" value="10/12/2012"/>	
Location of Issue <input type="text"/>	

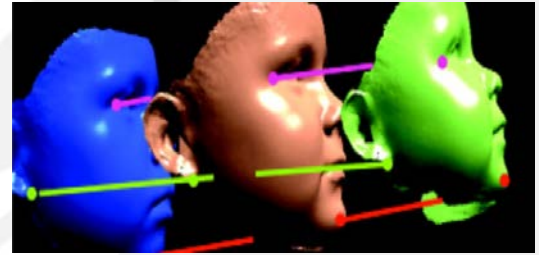

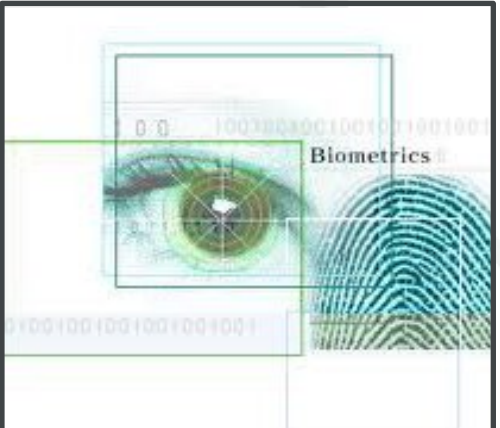

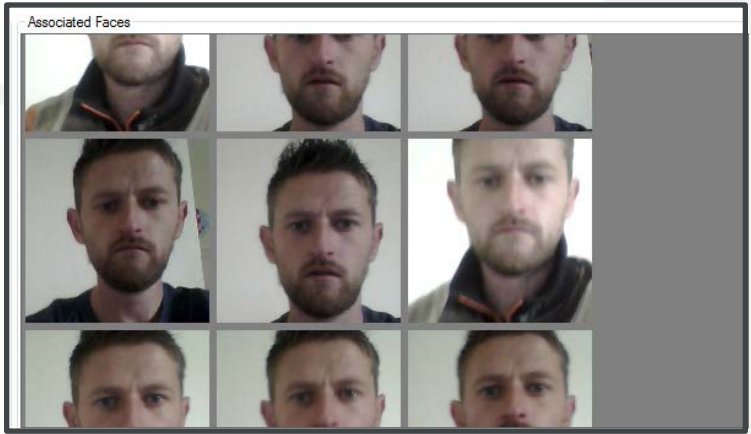

Automated Person Profiling

People Changing Appearance

🔄 Viseum iVOS FaceRec is always automatically learning and it can also include changes to a person's appearance.

Alarms

- Viseum iVOS FaceRec watches for suspects to give on-screen and direct alarms to security staff.
