

Safe City Test Site

POC/Pilot

Viseum has developed its Safe City Programme with optimised time and investment for its supply and use. By providing our customised design services in parallel, our customers start their project deployments faster. This unique innovation also effectively merges the separate and lengthy proof-of-concept (POC) and pilot [CCTV camera installation](#) phases.

Viseum Red Team/Blue Team Services - Project Design

Terrorists and other criminals with intent will study security systems to innovate, break through and commit their crimes. Central to countering this are the **Viseum Red Team Services**, extensively used to identify ways in which a city's security defences could be penetrated. Hand-in-hand with these are **Viseum Blue Team Services**, which then put the appropriate countermeasures in place for each design. This security expertise displays how essential it is to continue ongoing design innovation through the life of a security enterprise.

Viseum Software Technology Services and Equipment

The test site will be designed for routine automated surveillance - targeting people, faces, vehicles and number plates, using the following Viseum iVOS Software Technology Services:

-  F3 (Find, Fix and Follow) – Viseum's Spatial Awareness Algorithms are also customised for the test site.
-  FaceRec.
-  ANPR.
-  Watch List Management System.
-  Social Media Investigations - introducing Viseum Investigation Bots.

Viseum Hardware Technology Services:

-  'N' number of Viseum IMC Cameras.
-  'N' number of Fixed Direction Cameras.

Optional:

-  Zero Light Infrared Modules.
-  Viseum Radio Series - Secure Wireless Communications.

Controlled Subject Testing

'N' number of people and vehicles will be enrolled onto the Viseum Watch List Management System, with their faces, social media test accounts, and/or vehicle registration numbers. These test subjects will circulate amongst non-enrolled vehicles and people. When automatically detected, each subject will be reported and processed using the Viseum Social Media Investigations. A test schedule will be developed to log successful results and with ways to penetrate the system.

> [Viseum Technology and Support Strengths](#) < This is a brochure presentation of our technical support and capabilities. It is very successful for Viseum sales training and provides our customers with confidence in our project support and delivery.

Legal Statement

We have invested heavily in the protection and policing of our intellectual property rights (IPR). Central to our business is the commercial protection we provide our partners in sharing these secured markets. We commit to the policing of this IPR in the following way: As with any infringement, its trade reseller is the primary target for legal action, which is, in turn, followed up by making the potential user aware of the infringing product's recall due to its illegal use. This is then followed up with full and complete legal action with the suppliers of such goods. This policy of proactive policing our markets in this way since 2002 has proven so successful that we have only ever identified one infringing party. A PLC entity was found to be trading with infringing goods and they can now no longer sell such goods into our international territories, nor can they secure investment due to this breach.

Viseum technology and software is protected by a number of intellectual property rights. Purchase of a Viseum-driven product from an authorized Viseum[®] supplier guarantees that it contains authentic Viseum[®] software, and carries with it a licence giving the purchaser permission to use the Viseum technology. Attempted use of Viseum[®] software without a valid license is in breach of international law.
