

Safer Communities Security Phenomenon

"A self-funded and organically grown security service that also makes money. This is truly innovative." UK Trade and Investment offering Viseum the largest financial Smart Award

This CCTV service is called **Viseum Community SafetyWatch**[®]. It is already so successful that it is on its way to every country on every continent and is naturally evolving into the world's largest CCTV network. It is increasing subscriptions because it operates so effectively, by moving crime to neighbouring communities that do not yet have the service. It is self-funded and organically grown because all businesses want to either associate themselves with it or be part of delivering it.

"This security success is crucial to London, the United Kingdom and indeed the rest of the world."

London Mayor's Office for Policing and Crime

**Community
SafetyWatch**[®]

The Metropolitan Police are installing Viseum Community SafetyWatch[®] pilots for London Safer Neighbourhoods. We are calling for more law enforcement agencies, states, cities and towns, police forces and governments, to become part of this safer society initiative in their public space areas. This is also to benefit from multiple revenues of the ongoing community's subscriptions and the **Trusted Premium Brand Alliance** that is associated with this service.

> [Viseum Technology and Support Strengths](#) < This is a brochure presentation of our technical support and capabilities. It is very successful for Viseum sales training and provides our customers with confidence in our project support and delivery.

Legal Statement

We have invested heavily in the protection and policing of our intellectual property rights (IPR). Central to our business is the commercial protection we provide our partners in sharing these secured markets. We commit to the policing of this IPR in the following way: As with any infringement, its trade reseller is the primary target for legal action, which is, in turn, followed up by making the potential user aware of the infringing product's recall due to its illegal use. This is then followed up with full and complete legal action with the suppliers of such goods. This policy of proactive policing our markets in this way since 2002 has proven so successful that we have only ever identified one infringing party. A PLC entity was found to be trading with infringing goods and they can now no longer sell such goods into our international territories, nor can they secure investment due to this breach.

Viseum technology and software is protected by a number of intellectual property rights. Purchase of a Viseum-driven product from an authorized Viseum[®] supplier guarantees that it contains authentic Viseum[®] software, and carries with it a licence giving the purchaser permission to use the Viseum technology. Attempted use of Viseum[®] software without a valid license is in breach of international law.
