

iVOS FaceRec

IAPR - Automated Person Recognition - uses the most up-to-date technology to automatically identify facial features and to match them with facial features stored in relevant "Suspects" databases. Most people have heard of ANPR (Automated Number Plate Recognition): this now brings that recognised and well-used technology to the recognition of human beings.

The **Vis-SEEK** product allows live, in-time identification of suspects through state-of-the-art video technology.

Vis-SEEK Training Module Level 1: Facial Recognition

For end users of systems including Security Guards, Floor Management and CCTV Operators providing an understanding of facial recognition and implementation into the workplace.

Course Content:

- Introduction to Facial Recognition
- Legal Overview
- Suspect transactions
- Hand Held Overview
- Company Policy upon verifications
- Reporting outcomes to supervisor
- Live Demonstration

Duration: ½ day

Minimum Attendees: 6

Maximum Attendees: 12

Includes course material and certificate of attendance

The course is designed to provide participants with the necessary legal and operational knowledge to operate the facial recognition system. This course specifically will enable Man Guards, Floor Management and Operators to have a clear understanding of company policy relating to facial recognition and their responsibilities of legal requirements.

IAPR - Automated Person Recognition - uses the most up-to-date technology to automatically identify facial features and to match them with facial features stored in relevant "Suspects" databases. Legal Statement

We have invested heavily in the protection and policing of our intellectual property rights (IPR). Central to our business is the commercial protection we provide our partners in sharing these secured markets. We commit to the policing of this IPR in the following way: As with any infringement, its trade reseller is the primary target for legal action, which is, in turn, followed up by making the potential user aware of the infringing product's recall due to its illegal use. This is then followed up with full and complete legal action with the suppliers of such goods. This policy of proactive policing our markets in this way since 2002 has proven so successful that we have only ever identified one infringing party. A PLC entity was found to be trading with infringing goods and they can now no longer sell such goods into our international territories, nor can they secure investment due to this breach.

Viseum technology and software is protected by a number of intellectual property rights. Purchase of a Viseum-driven product from an authorized Viseum® supplier guarantees that it contains authentic Viseum® software, and carries with it a licence giving the purchaser permission to use the Viseum technology. Attempted use of Viseum® software without a valid license is in breach of international law.
