Main Expertise and CCTV Innovations

Viseum is the fastest evolving CCTV technology business in the world. We are used to protect cities, towns and borders, and some of the most important people and assets throughout the world. We are known primarily for solving the problem of populated and unpopulated wide-area CCTV surveillance. Our proven methods of fighting crime with limited manpower, have evolved over many years. To produce the most effective end-to-end and integrated CCTV security systems. Our intelligent CCTV solutions sustain the long-term deterrent. We do this by automatically presenting the right amount of high-quality CCTV video evidence to the right people at the right times so they can:

- Ⓛ React fast and effectively during emergencies, and,
- Ⓛ Clear up crime in the most efficient way during rapid investigations.

General References

Viseum has a track record of delivering security successes to business and residential communities. This is where several years of other crime reduction initiatives have previously failed. This is why Viseum has received many publicised endorsements from many highly reputable public bodies.

Metropolitan Police Service – New Scotland Yard

The Viseum technical support team, designed, set up and commissioned the Metropolitan Police Service's [wireless](#) CCTV mobile communications services for London. The Metropolitan Police said, "The Viseum support team have proved throughout that they are available to deal with any technical request. Their team offers support when others do not have support. Their vision in wanting to improve an already great product and service is astonishing. They often ask us how their systems could be improved for users. We are equally impressed that Viseum not only listens to comments but is always willing to implement our suggestions."
