

# Viseum iVOS Vehicle Crosscheck

*Another World's First from Viseum UK*

Using live and recorded camera streams to crosscheck the shape and colour of vehicles with registered vehicles number plates, to confirm if the colour make and model is matched.

# Viseum iVOS Vehicle Crosscheck

## Typical Customised Deployment Programme

(If vehicles are not already input into Viseum Global F3 Cloud Database Services)

1) Pilot Design	Working Days
Systems integration pre-planning – identification of the operational systems requiring integration with iVOS Vehicle Crosscheck; selection of pilot's initial make/models of vehicles; selection of pilot's initial number plate styles.	10
Systems research - analysis of the software interfaces of the national vehicle database and other operational systems identified for the pilot.	10
Agree and sign-off pilot test success criteria.	5
Understand the scope of solution deployment – e.g. identification of suspect vehicles; expansion of vehicle makes/models and number plate styles.	5
Define pilot system specifications, including location(s).	10
	<b>40</b>
2) Pilot Deployment	
Build pilot.	60
Install and commission.	10
Technical and operational training.	5
Execute pilot.	30 - 60
Changes and modifications to systems, operational processes and networking.	20
Define initial requirements for solution deployment.	5
	<b>130 - 160</b>
3) Solution Deployment	
Phased plan to include increasing the number of vehicle makes/models, styles of number plates, and integration with other national vehicle databases.

## Legal Statement

We have invested heavily in the protection and policing of our intellectual property rights (IPR). Central to our business is the commercial protection we provide our partners in sharing these secured markets. We commit to the policing of this IPR in the following way: As with any infringement, its trade reseller is the primary target for legal action, which is, in turn, followed up by making the potential user aware of the infringing product's recall due to its illegal use. This is then followed up with full and complete legal action with the suppliers of such goods. This policy of proactive policing our markets in this way since 2002 has proven so successful that we have only ever identified one infringing party. A PLC entity was found to be trading with infringing goods and they can now no longer sell such goods into our international territories, nor can they secure investment due to this breach.

Viseum technology and software is protected by a number of intellectual property rights. Purchase of a Viseum-driven product from an authorized Viseum<sup>®</sup> supplier guarantees that it contains authentic Viseum<sup>®</sup> software, and carries with it a licence giving the purchaser permission to use the Viseum technology. Attempted use of Viseum<sup>®</sup> software without a valid license is in breach of international law.
